SRI SATHYA SAI SANJEEVANI
**CHILDREN'S
HEART HOSPITAL
FIJI**

The Fijian Solution to a Pacific Problem

♥ Every year, approximately 200 children in Fiji and over 2,500 children in the South Pacific are born with Congenital Heart Disease (CHD).

♥ There are no pediatric cardiac services available in Fiji or any other South Pacific Island nation.

♥ The unavailability, inaccessibility and unaffordability of pediatric cardiac services results in a high number of children dying.

♥ Due to these staggering statistics, Sai Prema Foundation Fiji has opened South Pacific's first Children's free Heart Hospital.

♥ The Hospital will provide free Congenital Heart Disease (CHD) surgeries for the children of Fiji and the South Pacific. There will be NO BILLING COUNTER!

♥ This is the largest project ever undertaken by a Non-Government Organisation (NGO) in Fiji's history.

THE VISION OF THE SRI SATHYA SAI SANJEEVANI CHILDREN'S FREE HEART HOSPITAL IS TO EMERGE AND BE THE MOST IMPORTANT PEDIATRIC CARDIAC CARE CENTRE FOR THE WHOLE OF FIJI AND THE SOUTH PACIFIC ISLAND NATIONS.

“ The Sai Prema Foundation has earned the gratitude of the Fijian people. Thank you for all that you do. Thank you for the services you offer our people, and – above all else – thank you for the lives you have saved, and the lives you will save. Your immense impact on the health of our nation will never be forgotten. You are invaluable partners to my Government, and the tremendous impact you’ve had on the lives of young Fijians, in particular, cannot be fully captured in words. You’ve certainly set a very high bar in responsible and caring Fijian citizenship, and I very much look forward to all you have yet to achieve.

~ **Hon. Josaia Voreqe Bainimarama**
(Prime Minister of Fiji)
